

 AQUAVISION
PROFESSIONAL AUDIO VISUAL

the ultimate in luxury,
waterproof and in-wall televisions

AQUAVISION

From the originators of the bathroom television, Aquavision introduces the latest in home entertainment. Aquavision Series 4 has been designed to take technology beyond the boundaries of conventional television. Having manufactured bathroom televisions since 1997, Aquavision really is the most knowledgeable and experienced company in the business.

Aquavision is a completely independent television. Our televisions incorporate the latest and best features. Image quality is second-to-none, offering outstanding reproduction of detail and depth of images. The new screens accept industry standard 'High Definition' video formats (1080p, 1080i and 720p (model dependant)) perfect for watching the latest high definition media. With its slim and flush profile, your Aquavision unit can easily be fitted into any stud or solid wall and tiled or plastered-up to give that truly 'built in' look anywhere.

in the bathroom...

All Aquavision televisions are built to the latest regulations in waterproofing and safety and are designed to integrate into your bathroom or any other room, such as kitchens, swimming pool and garden environments, spas and saunas. They all feature heated screen areas to prevent the front misting up in humid conditions or even freezing-up in cold conditions and come with a master and a floatable, waterproof remote control.

in the sitting room...

Our televisions were originally designed for use just in bathrooms, however due to their sleek and sophisticated design, Aquavision is increasingly being installed in other areas of the home such as living rooms and bedrooms. In fact they can be installed anywhere you would want a television. The Series 4 in-wall televisions will complement and blend into any environment.

"The ultimate in
contemporary luxury"

HOMES MAGAZINE

the range

AQUAVISION

T-RAIL

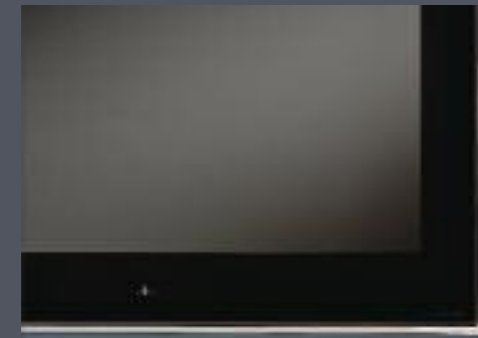

Aquavision's Towel Rail range incorporates a 17" wide screen, digital Freeview HD ready television with a high quality towel rail, which is ideal for recto fitting to existing bathrooms or for creating a unique look in new ones. All Aquavision Towel Rails are manufactured in the UK using high quality components and feature chrome plated solid brass rails and a unique valve design hidden in the fixing brackets. Towel rails can be supplied configured for hydronic, sealed electric or dual fuel operation. They can also be specified with Mirrorvision, Black or Polar White glass.

glass finishes

polar white

Features a special optically clear glass that enhances picture quality and eliminates picture degradation caused by normal 'green' glass. There is a simple black border around the screen to enhance the picture clarity and the Aquavision logo in pale grey. The logo acts as a window indicating the power status LED light and the IR receiver.

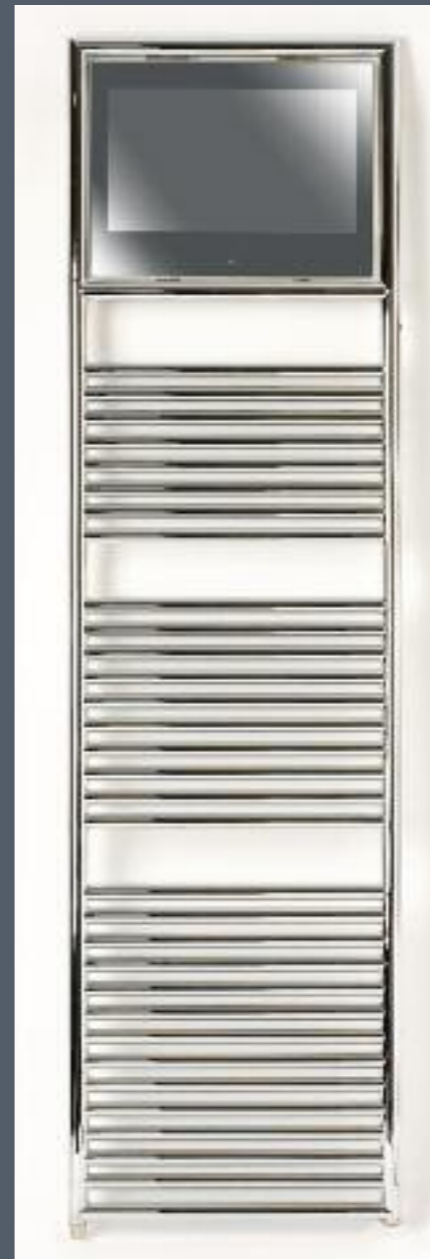

black

Exactly as it says, black ink baked onto the glass during toughening, but as with the above, we have applied this to special optically clear glass to ensure that the black stays black. The pale grey Aquavision logo acts as a window indicating the power status LED light and the IR receiver.

mirrorvision

When the TV is off, the glass takes the form of a mirror that is suitable for shaving, make-up etc. When the Aquavision is turned on, the mirror gives way to the television screen - a fantastic feature for bathrooms and bedrooms or even to go over the fire place in the living room. The pale grey Aquavision logo acts as a window indicating the power status LED light and the IR receiver.

Aquavision T4

Dimensions:
1800mm h x 577mm w

Aquavision T1

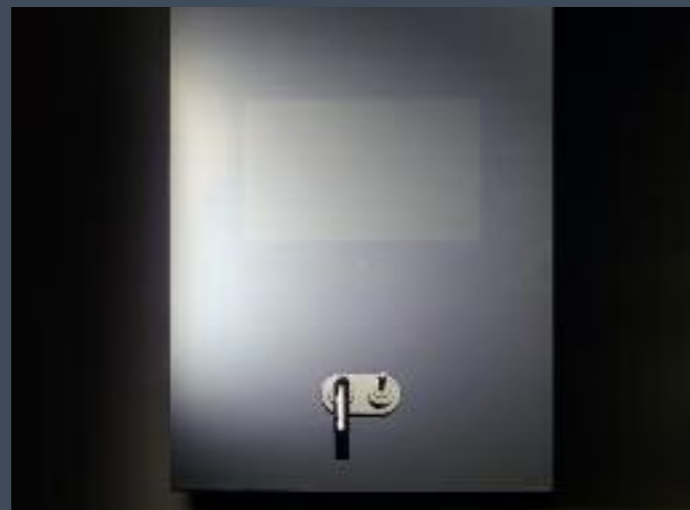

Dimensions:
824mm h x 577mm w

AQUAVISION VANITY

VaniTV from Aquavision is a Vanity Mirror incorporating a 17" widescreen HD Ready Digital Freeview Aquavision television.

- Mirror is 1000mm high x 600mm wide
- Full mirror
- Can be surface or flush mounted

Shown here with optional tap bracket.

AQUAVISION OUTDOOR

Aquavision's Outdoor range allows you to enjoy all the benefits of high quality television outside and is perfect for patio areas, swimming pools, etc. The range consists of the 32", 40" and 46" models supplied with black glass. Mounting options include flush mounting into a housing or a free-standing stainless steel case with an optional environmental control system for all year round weather protection.

AQUAVISION BESPOKE

Aquavision can supply bespoke mirror solutions for special applications creating a unique feature to any bathroom design.

Any of the Aquavision television range can be installed behind the mirror and the mirror can be supplied any size up to a maximum of 2m by 2m. Mirrors can be specified with Mirrorvision glass or a full chromed mirror with a blank glass area in front of the television screen.

Aquavision can also supply blank glass panels to match. Please ask your Aquavision dealer for more information.

AQUAVISION MARINE

Aquavisions are perfect for installing into all boats and yachts and have been specified by the major manufacturers around the world for both bathrooms and living spaces.

AQUAVISION KITCHEN

As Aquavisions are fully waterproof, have heated screens and are available in a wide range of sizes they are ideal for all kitchen requirements.

specifications

accessories

Waterproof Speakers

A pair of recessed ceiling mounted waterproof speakers supplied with 4 metres of connection cable.

Remote Switch Panel

All Aquavision televisions are supplied with a Master Remote Control for setting up and programming and a Waterproof Remote Control for day-to-day use of the main functions. In addition Aquavision can supply a wall mounted remote control panel for customers who would like the convenience of a switch panel mounted adjacent to the bath, shower or basin.

Galvanised Back Box

A galvanised back box is available for applications where the Aquavision television is to be mounted in a damp or dusty environment. They are also useful where a cast concrete wall is to be constructed. Generally most applications will not require a galvanised back box. Note this item is not required with the 17" and 46" models as the mounting arrangement includes a back box.
